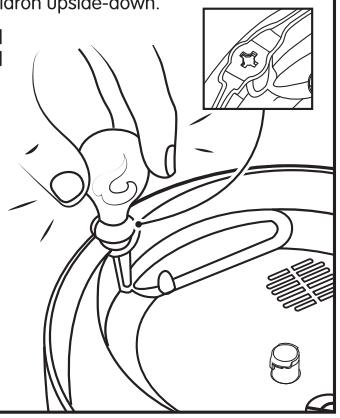
REFILLING THE MIST

After using your Cauldron* a few times, it may start to run out of mist. You can create more mist by refilling with liquid found in the Refill Vial.

1. Ensure all water/liquids have been drained from the Cauldron and it is in the reset position.
2. Unscrew bottom half of the Cauldron and set aside. Place the top half of the Cauldron upside-down.
3. Undo the lid on the Refill Vial and locate the cross-shaped hole in the Cauldron.
4. Place the end of the Vial in the hole until it stops and firmly squeeze 3 times. Do not overfill. Wipe up spills with damp cloth.
5. Remove the Refill Vial and seal it with the lid.
6. Reassemble the Cauldron.



*Sold separately to this pack.

TROUBLESHOOTING

Cauldron* emits an odor and there's little mist generated (in "Create Mode"):

- Switch to "Spell Mode" to avoid running the system without sufficient mist liquid.
- See "Refilling the Mist" section of this manual.

Cauldron no longer produces mist:

- Cauldron may have run out of mist liquid. You can create more mist by refilling the Cauldron using the Refill Vial.
- Ensure the Play Mode Switch is on "Create Mode". If the switch is in the "OFF" or "Spell Mode" position, then mist will not be created.
- Battery may be low on the Cauldron. Low battery may not allow full function. Charge battery using USB Charging Cable*.

*Sold separately to this pack.
